UWA Plus Micro-credentials
Critical Information Summary

Title and brief description	PUBHM502 Data Sources for Global Health. In many fields of work, it is becoming increasingly important to understand long-term and emerging global health trends. Changes in the demography, disease burden, and health workforce of countries around the world have a profound effect on the health, wellbeing, and prosperity of the population. This micro-credential will build your knowledge and skills to find and use data on these global changes, including data on prevalence of diseases, population growth and ageing, health workforce capacity, and health emergency data related to humanitarian crises and climate change. You will explore the many data sources that are available online, understand their strengths and limitations, and learn when and how to use them in your work.
Certified learning	(1) demonstrate an understanding of global health data sources that are available online.; (2) apply critical thinking around the strengths and limitations and when and how data sources should be best used; and (3) distinguish core concepts relevant to analysis of population health data, demographic data, and health workforce data.
How learner participated	Online only
Effort required (indicative)	50 hours made up of the following, synchronous seminars; asynchronous lectures; assessment (progressive); study and preparation
Main assessment task	Application of a skill to a complex problem,Application of multiple skills to complex problems
Indicative equivalent level	Postgraduate
Industry recognition	NA
Quality assurance	The quality of UWA Plus micro-credentials is assured through The University of Western Australia's standards and academic integrity processes.
Successful learner earns PD Points for conversion to:	2
. Admission to an award course	No
. Credit towards an award course	Yes
. If yes, how much credit?	Credit is less than one unit
