

UWA Plus Micro-credentials

Critical Information Summary

Title and brief description	ARCTM501 Practical Building Conservation: Conservation of Roofs This micro-credential is focused on conservation of roofs as building construction systems. It will cover the history and typical problems of roof structures and roof coverings, and the methods of surveying their condition and developing scopes of work for urgent repairs and maintenance schedules.
Teaching staff	Dr Ingrid Van Bremen
Certified learning	(1) apply research and investigation skills and an understanding of roof construction systems and materials to the efficient assessment and reporting of the condition of significant buildings; and (2) demonstrate an understanding of the principles of appropriate repair of roofs and a practical approach to developing schedules of work for conservation works and ongoing preventative maintenance for places of cultural significance.
How learner participated	Both onsite and online
Effort required (indicative)	50 hours
Main assessment task	Application of multiple skills to complex problems
Supervision and identity verification	Supervised online or onsite, identity not verified
Indicative equivalent level	Masters
Quality assurance	University of Western Australia
Successful learner earns PD Points for conversion to:	
• Admission to an award course	No Click or tap here to enter text.
• Credit towards an award course	Yes Graduate Certificate of Architectural Conservation; Master of Architecture
• If yes, how much credit?	Credit is less than one unit
