

UWA Plus Micro-credentials

Critical Information Summary

Title and brief description	BIOLM400 Ecological monitoring. This unit introduces students to the concept of designing monitoring programs using a systematic framework and explores the components that make up this framework. On successful completion of this unit, students will be able to demonstrate an understanding of what makes an effective monitoring program, and will be able to design a monitoring plan using best practice.
Certified learning	Students are able to (1) demonstrate an understanding of the key principles of ecological monitoring; (2) demonstrate an understanding of an effective monitoring plan; (3) critically evaluate an existing monitoring plan; and (4) develop an ecological monitoring plan for a selected case study.
How learner participated	Online only
Effort required (indicative)	150 hours
Main assessment task	Application of multiple skills to complex problems
Supervision and identity verification	Supervised online or onsite, identity not verified
Indicative equivalent level	Masters
Quality assurance	UWA
Successful learner earns PD Points for conversion to:	Students who complete this micro-credential can apply for advanced standing if they subsequently apply for a Master of Environmental Science
