

UWA Plus Micro-credentials

Critical Information Summary

Title and brief description	PHCYM505 Prescribing skills for pharmacists. This microcredential provides the necessary knowledge and skills for pharmacists to demonstrate the competencies to prescribe. Pharmacists will demonstrate the ability to support person-centred, safe quality use of medicines to deliver a person-centred prescribing process. They will demonstrate professional practice that supports prescribing.
Certified learning	(1) evaluate and document the outcome of prescribed medicines; (2) prescribe medicines legally, ethically, with integrity, safely, efficaciously and judiciously and compliant with applicable professional codes and guidelines consistent with applicable regulatory frameworks and organisational requirements for prescribing including preparing an accurate and legal prescription; (3) respond appropriately to adverse outcomes and to the review; (4) accurately document all prescribing decisions and clinical reasoning; (5) maintain and improve prescribing practice including demonstrating a reflective approach to reviewing, maintaining and, where appropriate, improving prescribing knowledge and skills; (6) use a culturally safe, respectful, inclusive, sensitive and collaborative approach to undertake a comprehensive consultation and determine the consumer's needs; (7) recognise personal competence and respond accordingly to provide optimal care; (8) prescribe medicines collaboratively with consumers and other health professionals; (9) consider the management options using a consumer-focused approach and an understanding of relevant evidence; and (10) collaborate with consumers and other health professionals to support effective care.
