

Where does water come from?

THE UNIVERSITY OF
**WESTERN
AUSTRALIA**

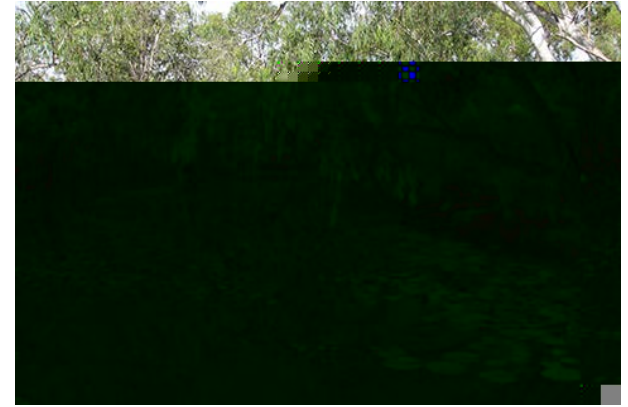

Government of Western Australia
Department of Education

You get water
from a tap.

But where does
that water come
from?

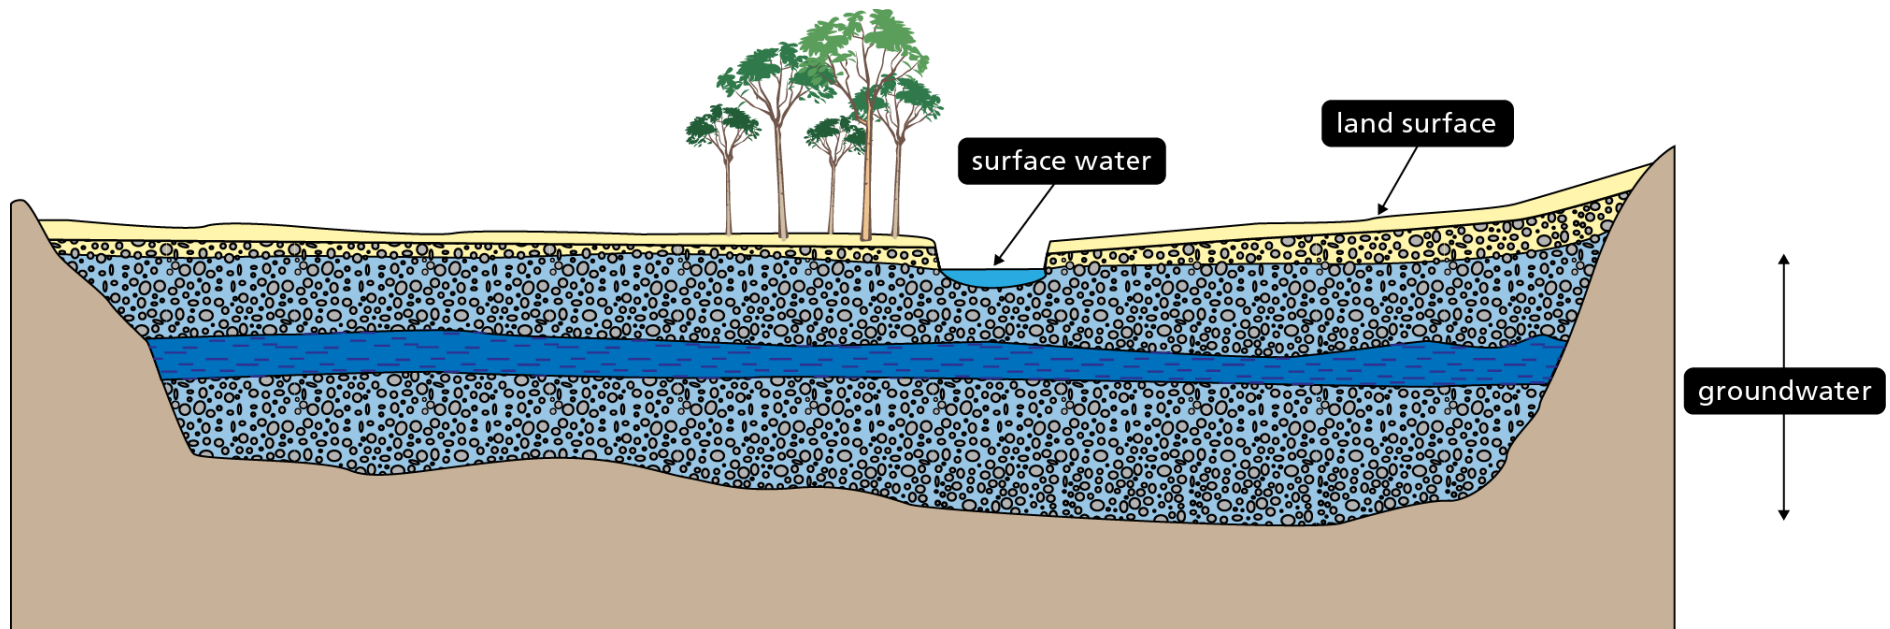

There are many places that
water *might* come from.

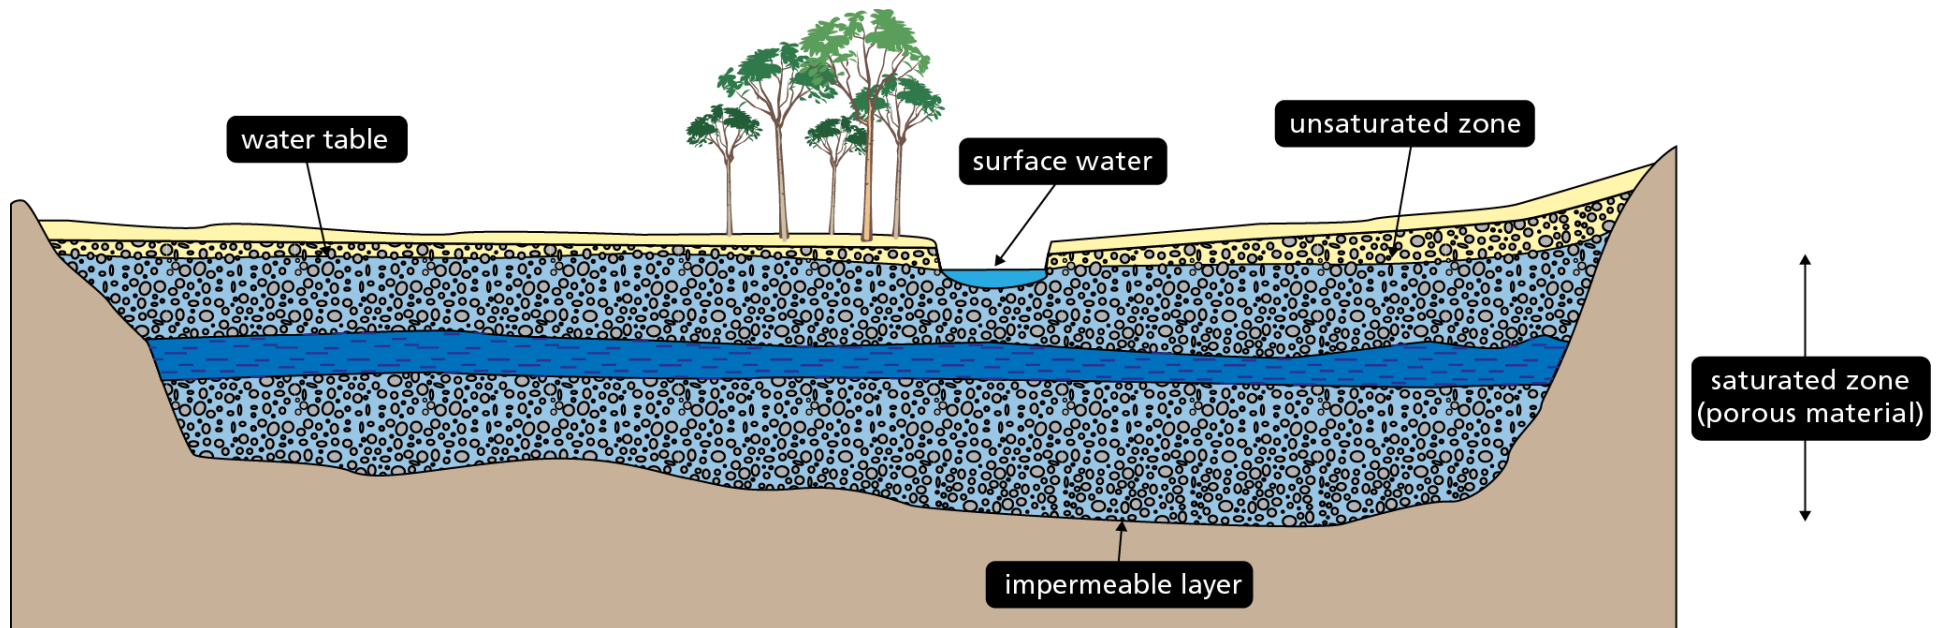

Most of your
water comes
from
underground.

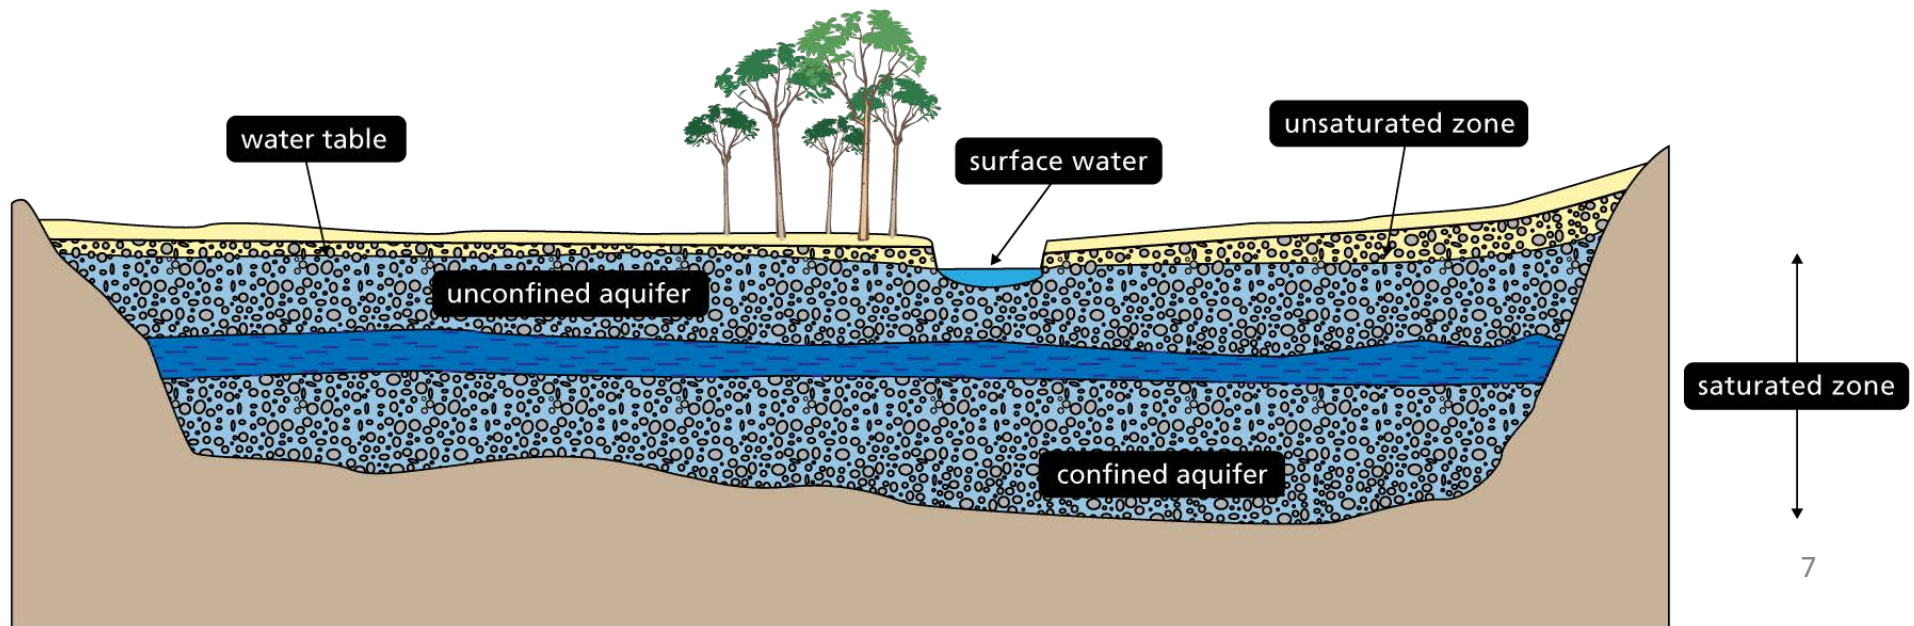

It's called groundwater.

Groundwater aquifers

Types of aquifer

Build an edible
aquifer.

Layers in the edible aquifer represent:

- topsoil
- unsaturated zone
- confining layer
- water table
- saturated zone
- porous gravel
